<sup>1</sup> Fungicide Resistance Action Committee Codes (FRAC): fungicides with the same FRAC code have the same mode of action. M-codes indicate multi-site chemicals with low risk of resistance development. P-code indicates host plant defense induction.

<sup>2</sup> Use of chlorothalonil is regulated in Massachusetts under the Public Drinking Water Supply protection regulations, see the Pesticide Regulations section of this guide for details.

<sup>3</sup> Phosphite (salts) is also commonly referred to as phosphorus acid or phosphonate.

<sup>4</sup> Use of triticonazole is regulated in Massachusetts under the Public Drinking Water Supply protection regulations, see the Pesticide Regulations section of this guide for details
